

WISCONSIN WILDCARDS

WISCONSIN STATE FORESTS

SOUTHERN UNIT OF KETTLE MORaine STATE FOREST

Managed to provide: places to have fun, resource protection, wildlife habitat and products we need—like paper and wood.

ORIGIN: In 1939, the first parcel of this State Forest was purchased to protect glacial formations and provide recreation to the Milwaukee area.

FOREST CHARACTERISTICS: Almost 21,000 acres of glacial hills form this landscape. Oaks dominate the forest community.

ACTIVITIES: Discover extensive trails! Hike a section of the Ice Age National Scenic Trail, or visit Paradise Springs—a 5,000 gallon/minute spring house!

UNIQUE FEATURE: Kettles galore! See the pit-like depressions formed when huge blocks of glacial ice, buried under debris, melted away 13,000 years ago!
